

Brainstorming & Idea Prioritization Template

Date	15 July 2026
Team ID	TM-RISINGWATERS-04
Project Name	Rising Waters: AI Powered Flood Prediction System
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Arthala Poojitha	Predict flood hazard index utilizing multi-model classification models (Decision Tree, Random Forest, XGBoost) with meteorological parameters.	Machine Learning	1
2	Sai Vamsi Bommu	Construct interactive visual analytical graphs (distribution plots, box plots, heatmap correlations) inside a web interface.	Data Visualization	2
3	Maraka Krishna Sai	Develop real-time sensor network using physical water-level and humidity hardware to send telemetry directly to database tables.	IoT / Hardware	3
4	Nalla Yudeshna	Implement Flask web-application supporting interactive dynamic user input panels loading serialized XGBoost models.	Software Web App	1
5	Supriya Rapuru	Set up active SMS alert broadcast API configurations to push safety protocols to citizens when high flood risk triggers.	Warning System	3
6	Sai Vamsi Bommu	Incorporate cloud runtime servers (such as IBM Cloud Engine) to deploy the Flask application for external client reach.	Cloud Deployment	1

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1		High	High	1	Yes

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
	AI-powered ML flood prediction utilizing serialized XGBoost engine hosted on Flask framework with IBM Cloud deployment.				
2	Interactive stand-alone local EDA visualization dashboard utilizing Python graphics libraries.	High	Medium	2	No
3	Physical IoT-integrated water telemetry sensors coupled with automatic cellular broadcasting warnings.	Low	High	3	No
